INFINITY
DANCE

Letter from the Directors

To the families who make Infinity Dance feel like home,

As the year winds down, we've found ourselves lingering in the studio a little longer — watching dancers gather in the lounge between classes, glancing through the viewing windows, and seeing parents settled in the lobby, sharing smiles, stories, and encouragement. Those everyday moments remind us just how special this community truly is.

When you choose Infinity Dance, you're trusting us with your dancers and with a piece of your family's world. As a mom-and-daughter team, we understand that trust on a very personal level. We feel it in the excitement dancers bring into class, in their dedication during rehearsals, and in the conversations we share with parents who care so deeply about their kids.

This studio has always been about more than technique. It's about confidence growing week by week, friendships forming in the dancer lounge, and a supportive atmosphere that feels welcoming to dancers and families alike. That sense of warmth exists because of the people who walk through our doors — you.

There is something especially joyful about this season. With holiday music filling the studio and Nutcracker Sweet coming to life, the energy feels extra meaningful. Watching dancers work hard, support one another, and take pride in their progress is one of the greatest parts of what we get to do.

We are so proud to share Nutcracker Sweet with you and hope it becomes a sweet part of your family's holiday traditions, just as it has become for ours.

Thank you for trusting us, for supporting one another, and for helping make Infinity Dance feel like home. This studio is a reflection of the love, dedication, and care you bring into it, and we are truly grateful for each and every one of you.

Wishing you and your families a holiday season filled with warmth, joy, and togetherness. We cannot wait to continue growing and dancing with you in 2026.

With so much love and gratitude,

Warmest Regards,
Gina Chanos &
Carissa Nichols
